

BRILL MANUFACTURING COMPANY / LUDINGTON, MICHIGAN 49431

Rec'd
Sept. 15, 1975

1946/1976 . . . For thirty years, Brill Designers and Craftsmen have been conscientiously building fine furniture from genuine Michigan Knotty White Pine.

The skill of our artisans, coupled with the knowledge gained through research into woods and their finishes is reflected in our latest creations shown here.

Brill Pine has the charm of a Wayside Inn with the comfort and practicability that is demanded in today's living. It becomes a part of the family, the warmth and usefulness continuing to grow with them.

Strict attention has been given to every detail, such as extra thick comfortable cushions filled with high quality foam and zipper enclosed to facilitate cleaning, hardware especially designed to complement the styling, and accent colors available for the decorator's touch.

Made extra heavy for durability with solid wood tops; constructed to hold warping and checking to a minimum.

The applications in contract work are well known and many restaurants, ski lodges, motels, taverns, resorts and nursing homes have found Brill the answer to their furnishing problems.

We are proud of the skilled hands that build this furniture and are pleased indeed to present it for your approval on the following pages.

R. W. Brillhart

Thirty Consecutive Years of Building Quality Furniture

It is impossible to duplicate exactly on paper the beauty of a good wood finish with its rich tones in the natural grain of the wood.

Our new Autumn Brown finish is a medium shade obtained with a glaze over sealer, then hand wiped to bring out the attractive high lighting desired in a good pine finish. Mild distressing adds to the beauty of each piece.

Our finishes are durable, liquor resistant, and meet the strictest requirements called for on the many contract jobs that we do.

On large contract installations, we also offer our Smokey Pine, Pine Cone and Old English finishes; samples of these are available upon request.
